## Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2016 - December 31, 2016

Filing Confirmation Number: 0007601003

Filing Deadline: March 23, 2017

FRN: 0001630201

Filing Date: 12/22/2016 06:39 PM

### General Report Information

#### Type of Company

Service Provider

#### De Minimis Exception

Did you offer any handsets to subscribers in the United States during the reporting period? Yes

Have you been offering handsets in the United States for at least three years prior to the end of the reporting period? Yes

Date that you began offering handsets in the United States

Are you a small entity? Yes

Were you a small entity at any time during the three years prior to the end of the reporting period?

Date that you ceased to be a small entity?

#### Company Information

Company Name: Union Telephone Company  
Brand Names: Union Wireless  
PO Box: 160  
Street Address: 850 N. Hwy 414  
City: Mountain View  
State: WY  
Zip Code: 82939

Contact Name: Carl Smith  
Contact Phone: (307) 782-4190  
Contact Fax:  
Contact Email: cjsmith@unionwireless.com

#### Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? Yes

Agent Name: Lukas, Nace, Gutierrez & Sachs, LLP  
PO Box:  
Street Address: 8300 Greensboro Drive, Suite 1200  
City: McLean  
State: VA

Contact Name: Pamela L. Gist, Esq.  
Contact Phone: (703) 584-8665  
Contact Fax: (703) 584-8696  
Contact Email: pgist@fcclaw.com

### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

Yes

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Yes

Website address: <http://www.unionwireless.com/Phonesnew.aspx>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company web site, and retail sales personnel are trained to assist with compliant digital wireless phones. Compliant handsets are available for testing from live phone displays in retail locations. Written materials, pamphlets and other promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Consumers are given a thirty day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

### Methodology for Functionality Levels

Basic: These phones are moderately priced and useful for voice calls and text messages. They often have a camera, basic Bluetooth audio, Internet browsing, and a music player. Typically these phones offer less capable productivity applications and shorter average talk time. Most of these phones are generally smaller in size compared to more advanced models, and they lack features such as cloud-based services, expandable memory, and ability to download additional applications from third-party sources.

Utility: These phones vary from a moderate to high price and are designed to have features that most customers desire. They offer median quality cameras, handsfree and headset Bluetooth profiles, expandable memory, larger screens with enhanced color display, and increased talk time over basic models. They provide customers with access to third-party application stores from providers such as Apple, Google, and Amazon. However these phones offer fewer features and slower performance on multitasking and other processing intensive applications than Enterprise models.

Enterprise: These devices are higher priced phones offering enhanced features such as a premium quality camera, multiple Bluetooth profiles, high speed processing and robust application multitasking, enhanced productivity and communication toolsets, plentiful talk times, and access to application stores from third-party providers such as Apple, Google, and Amazon. Additionally, they typically have robust management of POP3 email services and often offer synchronization with MS Exchange or other corporate style email and calendar services. They offer expandable memory for storing music, pictures and video. A software package and USB cable will often be provided to allow synchronization to a computer for music, document, or other data transfers.

### Report Remarks

Union Telephone Company does not operate network facilities utilizing a GPRS, EDGE, WiFi or WiMax air interface.

You have reported the following handset model summary information.

Total number of handsets offered: 71

Air Interface	Fully Hearing Aid Compatible		Acoustic Coupling Compatible Only		Non-Compliant Handsets		Total by Air Interface
	Number	Percent	Number	Percent	Number	Percent	
GSM	49	69%	5	7%	17	24%	71
WCDMA	40	67%	3	5%	17	28%	60
LTE	30	83%	1	3%	5	14%	36
Wi-Fi	33	61%	4	7%	17	31%	54
